EDUCATION

B.E.

Computer Science and Engineering

S.A. Engineering College

📅 November 2021 - current

📍 Chennai, Tamil Nadu, India

🎓 CGPA: 8.2

Relevant courses

- Value added course on MongoDB and DynamoDB
- STEP English Proficiency Plus Test - Scored 9.2/12
- HackerRank Java(Basic) Certificate
- HackerRank SQL Certificate
- SkillRack SQL Certificate
- Currently enrolled in AWS Course
- Value added course on Full Stack Web Development

SKILLS

Technical Skills

- Java
- C
- SQL
- HTML/CSS

Soft Skills

- Time Management
- Critical Thinking and Decision Making
- Creativity and Positivity
- Teamwork and Discipline
- Strong Interpersonal Communication Skill

CAREER OBJECTIVE

A highly motivated and results-oriented professional pursuing B.E Degree in Computer Science & Engineering. Skilled in teamwork, communication, and interpersonal relations. Seeking a challenging position in a forward-thinking organization where I can apply my analytical and technical expertise to drive company growth and continuously improve personal development.

PROJECTS

Multiple Disease Detection System Using Machine Learning

- A machine learning model for detection of diseases like diabetes, heart disease, and Parkinson's disease.
- The application employs various machine learning models trained on relevant datasets containing labeled patient information. Users can conveniently input their health data through a secure interface. The system then predicts the likelihood of developing each disease.

PAPER PUBLICATIONS

- Going to publish a paper on "A Multi-Disease Prediction Web Application for Early Disease Risk Assessment".
